Number of studies (log-scaled)

0 | 1–2 | 3–5 | 6–10 | ≥11

Highest effectiveness grade achieved

- ★ **Strong:** ≥3 positive studies; consistent fairness gains
- ▲ **Moderate:** 2+ positive studies; minor trade-offs
- ● **Mixed/Failed:** contradictory or no improvement
- – **None:** no studies tested this pair

Note

Each cell shows the number of unique studies that explicitly tested the bias–mitigation pair and the highest effectiveness grade across those studies (symbol). Data from systematic review of 78 studies (Jan 2017 – Mar 2026). Totals indicate studies per bias category and per mitigation family.
